

LCD MONITOR PROTECTION FILM

SUPER HIGH GRADE LCD PROTECTION

Kenko LCD Monitor Protection Film are comprised of multiple layers to give the best screen protection as well as the best enhanced viewing of the LCD. The layers consist of:

1. Anti-smudging top coating to reduce finger-prints
2. AR Anti-reflection coating to enhance viewing in lighting conditions such as bright sunlight where reflections can be a problem for LCD viewing
3. Core hard coating layer to protect the LCD from scratches
4. Base film
5. Adhesive layer to attach to the LCD

The Kenko LCD Monitor Protection Film comes in many different sizes to match today's most popular digital SLR cameras and some high-end point and shoot digital cameras as well. The camera type is shown prominently on the packaging. Many come with a protector for the main LCD on the back of the camera and a second fitted smaller protector if the model of camera has a second LCD control panel.

Kenko LCD Monitor Protection Film are available for the following cameras:
